Profile

Versatile developer with demonstrated experience in education technology. Able to bring projects to life from the entire stack. A self-starter with a true passion for building intuitive, dynamic interfaces for an enjoyable user experience.

Employment History

Web Developer, Gradelink

Jan 2015 – Present   Foothill Ranch, California

- Single-handedly designed mobile application using Ionic 1, Cordova, Web APIS, and SQL for front-facing end user. Provided full maintenance and further upgrades to Angular 2 and Ionic 2.
- Implemented and established Angular 2 github repo for department-wide usage. Setup server for internal developer usage.
- Lead and manage developer sprints and workloads within Jira.
- Designed and created a chat application for client use within our software utilizing Angular 2 and SignalR.
- Authored a process in the middle tier to scrape source text for English words and expressions for internationalization purposes. Implemented an AhoCorasick algorithm to improve speeds on text replacement for non-English languages.
- Created a web application allowing for offline functionality of reading and writing data via workbox and indexeddb.

Project Manager, Gradelink

Jan 2014 – Jan 2015   Foothill Ranch

- Provided pricing quotes and design for custom, interactive online forms for front-facing users.
- Addressed customer needs and trained clients on how to utilize online form tools.
- Interacted with clients to design customized school websites via Wordpress utilizing knowledge in HTML, CSS, PHP, Javascript, and jQuery.
- Created and managed a LAMP server for Wordpress shared website hosting.
- Designed standard operating procedures and supplied training to internal development team for online form creation, websites, Jira, Angular, and Ionic.
